

Complementing its broad line of wire, cable and connectors, A.E. Petsche Company offers a wide range of harness management products. These products offer users cost effective solutions to protect critical electrical systems.

Heat Shrinkable Tubing

A.E. Petsche Company offers the industry's widest range of heat shrinkable tubing types. The company offers single and dual-wall tubings in thin or heavy wall versions. Dual-wall tubings offers an environmental seal to protect critical connections. In addition to bulk shrinkable tubing, A.E. Petsche Company offers a variety of value added tubing services, including pre-marked, cut pieces, and kitting capabilities. Ask your A.E. Petsche Company sales representative for a complete tubing selection guide.

Identification Systems

A.E. Petsche Company offers a variety of labeling solutions to identify interconnect components. Easy-to-use software accepts data from mainframe systems and utilizes a variety of commercial printers. Markers produced in this system include shrinkable tubing and a wide range of adhesive-backed labels. These high-performance markers are available for operating temperatures as low as -55° C to over 200° C. *In addition to electrical harness related identification products and systems; A.E. Petsche Company offers wrap around tapes for hydraulic or fluid line identification.*

Solder Sleeves & Crimp Devices

Labor saving alternatives to craft-sensitive and time-consuming hand soldering or crimping. This family of products combines insulation, strain relief, environmental protection and electrical interconnection.

Molded Parts and Adhesives

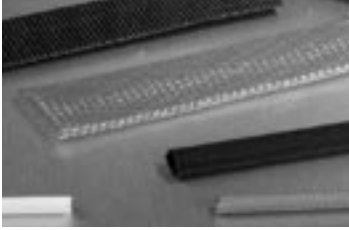

A.E. Petsche Company stocks a wide variety of shapes and materials for the most demanding applications. Molded Parts used in conjunction with adhesives offer highly durable and environmentally sealed transitions. Materials available include: semi-rigid and flexible polyolefin, diesel-resistant polymers, Viton*, neoprene, and other elastomers.

HARNES MANAGEMENT PRODUCTS

Interconnect Specialists™

High-Performance Sleeving

Both expandable and electrical high-performance sleeveings are offered by A.E. Petsche Company. These products are used to protect wire and cable from mechanical abrasions, cut-through, dirt, and environmental hazards. Products are available for operating temperatures from -70° C to over 260°C.

Cable Ties and Accessories

From its wide inventory of harness management products, A.E. Petsche Company offers most standard and specialized cable ties and accessories. These products include cable ties, hold downs, grommet striping, and harness board fixtures; virtually every product you need to assemble and protect a high-performance harness.

Overbraid Material

A.E. Petsche Company is a leading supplier of overbraid materials including both pre-braided metallic [QQB] and non-metallic braids, as well as raw materials utilized for in-house braiding equipment.

Lacing Cord

A.E. Petsche Company stocks a wide variety of lacing cord types, including high temperature products, and easy to apply flat lacing cord. Many colors and styles are available from stock.

Conduit Systems

Offering both off-the-shelf and customized conduit systems and accessories, A.E. Petsche Company offers its customers the ability to encapsulate critical harnesses. Typical applications would include landing gear and engine systems, or wherever a high degree of protection is required. To learn more about A.E. Petsche Company's custom conduit system designs please contact your local A.E. Petsche Company representative.

Tools

A.E. Petsche Company stocks virtually all tool types required to assemble high-performance harnesses. These include bench-mounted and hand-tool types used in the following applications:

- ✦ Wire & Cable Cutting and Stripping
- ✦ Heat Guns for use with Shrinkable Tubing & Molded Parts
- ✦ Contact Insertion & Extraction Tools
- ✦ Banding & Crimping Tools for Backshell Installations
