

As part of its comprehensive Interconnect Solutions offering, A.E. Petsche Company provides its customers a range of cost reducing Value Added Services. Customers may select only those services, which streamline production or reduce in-house costs.

A. E. Petsche Company Services include:

Connector Assembly

As a Class C Value Added assembly house, A.E. Petsche Company can preassemble or kit custom and "QPL" connector configurations from a large in-house inventory. For additional detail on A.E. Petsche Company's connector products, see "Connectors and Backshells" data sheet.

Kitting

For added convenience and production efficiency, A.E. Petsche Company can kit any harness assembly configuration combining wiring, harness management products and/or connectors.

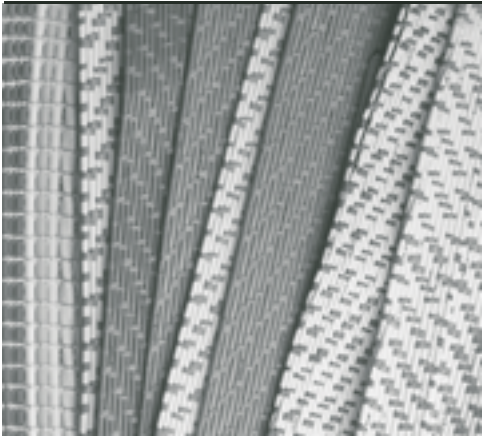

Wire Marking, Striping & Cutting

Utilizing in-house inkjet or laser marking and cutting capabilities, A.E. Petsche Company offers pre-marked and cut wire/cable products to customer specifications.

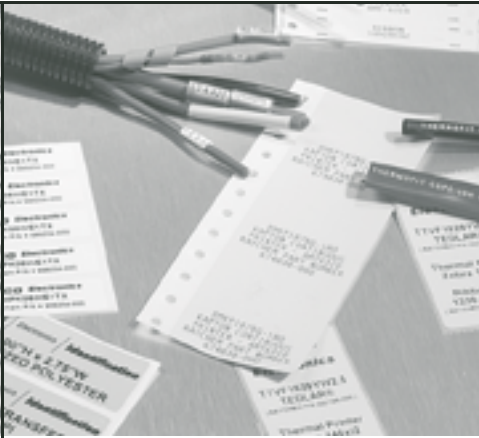

VALUE ADDED SERVICES

Interconnect Specialists™

Wireweave

A.E. Petsche Company produces a wide range of Wireweave™ cable types including those utilized in Organized Wiring Systems (OWS).

Pre-Cut / Printed Markers

A.E. Petsche Company routinely provides customers with a variety of pre-marked labels and shrinkable sleeves. Made to order labels can be provided to include customer logos, barcodes and virtually any type of custom legend.

Bar Coding

A.E. Petsche Company provides pre-bar coded materials to meet customer's requirements. Barcodes allow users to quickly check-in materials and minimize paperwork.

Termination

In addition to precutting and marking of wire & cable, A.E. Petsche Company offers complete terminations up to, and including, full cable assemblies.

Optimized Packaging

A.E. Petsche Company supplies many customer's products or groups of products in optimized packages. Options include spooled down wire and cable products or lightweight, easy to handle packaging. These smaller packages allow customers to reduce scrap, and minimize inventories.

Recycling Programs

For large ZERO-BASE® customers, A.E. Petsche Company provides spool recycling, allowing customers to return polystyrene spools and minimize environmental impact.

Rotating/Returnable Carts/Bins

A.E. Petsche Company offers customized carts/bins, which allow customers to easily move large quantities of interconnect products to the shop floor. These reusable, space efficient containers, allow customers to reduce or eliminate packaging and improve material flow.
