

Customized Interconnect Solutions to Streamline Production and Reduce Your Costs

At A.E. Petsche Company we offer value-added services to tailor all aspects of customer orders from products to logistics. Offerings include C-Class QPL connector assembly, pre-marked wire/cable products and custom harness management solutions — all designed to dramatically reduce inventory and cost.

Wire and Cable

Through our wire and cable value-added services, you can customize your order to the exact specifications needed for your application.

CUT WIRE AND TUBING

Our in-house capabilities allow cutting of wire to fit your exact needs

KITTING

We can transform any harness configuration, including wire, accessories, or connectors, into an easy to use kit that will decrease your production time

WIRE MARKING

High quality, contrast marking in either Ink Jet or Laser printing

MARKERS

Made-to-order labels can include customer logos, barcodes, and virtually any custom request

SPARK TESTING

Trust in our quality through our spark testing and respooling on Teflon and other insulated wire

STRIPING

Our spiral striping system offers additional wire identification

TWISTING WIRE

We can twist up to 4 reels for twisted pairs of quadding

Connector Assembly

As a Class C value-added connector assembly distributor, A.E. Petsche Company can customize a wide range of connector types in-house, from stock.
