

A.E. Petsche Company, your distributor of high-speed rail interconnect products for the European market

A.E. Petsche Company has invested in a large profile of rail wire, cable, connectors, and harness management products, which can be delivered with quick turnaround times from our warehouses in Europe.

Rail Products Include:

- > EN50264 and EN50306 wire and cable (0.5mm to 95mm sq)
- > Cable Idents (HX zero halogen versions)
- > Terminal Lugs (AWG and Metric – up to 240mm sq)
- > Rectangular and circular connectors

The application of these products is for use mainly on rolling stock with OEMs. Due to our stock holding, we can support prototype and pre series build of rolling stock equipment such as air-con, lighting, power conversion, braking systems, passenger information systems, drivers cab etc.
