

An Arrow Company

December 2013

Subject: REACH Regulation (EC) No 1907/2006

Dear Customer,

A.E. Petsche has been actively monitoring the specifics of the REACH requirements since the EU adoption of Regulation No 1907/2006 on 18 December 2006 supporting in full its aim at improving the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances.

This letter is to reassure our valued Customers that A.E. Petsche meets applicable REACH requirements and it is committed to provide our Customers with information about SVHCs (Substances of Very High Concern) in articles as required.

If articles contain SVHCs above the concentration limit of 0.1% on an article level, the manufacturer, who is the only source of reliable information about the chemical substances used in their products, must inform downstream users these substances, even if the chemical substance will not be released under normal or reasonably foreseeable conditions of use.

In such a case, to the best of its knowledge, A.E. Petsche will pass on information along the supply chain in accordance with Article 33 of the REACH Directive through a specific notification statement made available on business documents at part level. Any information supplied by A.E. Petsche in relation to SVHCs is provided "as is" according to information given by the Manufacturers of the articles, without any warranty whatsoever, such as all warranties implied in law, including the warranties of merchantability and suitability for a particular purpose. Use of data is at customer's sole risk.

A.E. Petsche is monitoring all new developments and obligations regarding REACH and Annex XIV (the "Candidate list"). In case of changes which affect our obligations towards our Customers, we will update our policy accordingly.

Be assured that your business is greatly valued by A.E. Petsche and that A.E. Petsche will do everything within its power to provide you with the highest level of service and support.

We thank you for your continued support.
