RE: EICC CONFLICT MINERALS DECLARATION

Dear Valued Customer:

We are in receipt of your recent inquiry regarding tin, tantalum, tungsten and gold (“conflict minerals”), and understand your request. Arrow complies with Rule 13p-1 under the Securities and Exchange Act.

Arrow recognizes the responsibility not to support or contribute to the violence and human rights violations associated with the mining of conflict minerals in the Democratic Republic of the Congo and adjoining countries. Our company has established a policy statement to that effect, available at: <https://www.arrow.com/en/about-arrow/overview>.

The product manufacturers are the only source of accurate information regarding substances and chemicals, including any conflict minerals, used. We have prepared the attached EICC declaration for your convenience, covering products assembled and integrated by Arrow. However, because Arrow is a distributor and not the component manufacturer we cannot certify the accuracy of any information provided by any third party product manufacturers. For information regarding specific components, we suggest you subscribe to SiliconExpert Technologies. SiliconExpert works directly with product manufacturers to obtain conflict minerals data as well as hazardous substance content. Information regarding conflict minerals is available in the SiliconExpert parts database or visit: <http://www.siliconexpert.com>.

ANY INFORMATION SUPPLIED BY ARROW ELECTRONICS, INC. OR ITS SUBSIDIARIES IN RELATION TO A PARTICULAR PARTS CONFLICT MINERAL CONTENT AND ORIGIN IS PROVIDED “AS-IS” WITHOUT ANY WARRANTY WHATSOEVER, SUCH AS ALL WARRANTIES IMPLIED IN LAW, INCLUDING THE WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. USE OF THE DATA IS AT CUSTOMER’S SOLE RISK.

Arrow understands the importance of this issue to you, our customer. Arrow is committed to the pursuit of responsible procurement practices and has no intention, directly or indirectly, of abetting any human rights violations. We are a longstanding member of the Electronic Components Industry Association (ECIA), and more information can be found here: <http://www.eciaonline.org>.

Sincerely,
Arrow Electronics, Inc.
